

LO - To know the earth is divided into two hemispheres and have locational knowledge about the continents.

Let's recap what we did last week by watching this video that teaches us about Longitude and latitude:

<https://www.youtube.com/watch?v=cTrsvGytGG0>

Today you are going to use the link below to do a lesson about 'hemispheres'. You will learn how to name the hemispheres and locate which continents and countries sit within those hemispheres. There are some resources further along this page that will help you complete your tasks if you want to print them off.

Find the:

- Northern hemisphere
- Southern Hemisphere
- Equator

What is longitude and latitude?

To find out how far _____ or _____ a place is, lines of _____ are used. These lines run parallel to the Equator.

To find out how far _____ or _____ a place is, lines of _____ are used. These lines run from the top of the Earth to the bottom.

latitude	west	longitude
south	north	east

Which continents does the equator run through?

In the Northern hemisphere you would find:

In the Southern hemisphere you would find:

These continents cross over both hemispheres:
